

Depositit :: Service Benefits

www.depositit.com

At first glance all online backup solutions may appear the same – but upon close inspection:

Some solutions may:

- Send you adverts or marketing offers – very annoying
- Sell on your details – more spam!
- Make you login to your account to keep it live – risk of deletion of data
- Only allow you to restore one file at a time – extremely frustrating
- Only allow you to backup one machine – more usernames and passwords to remember
- Restrict the file size you can backup – no big files allowed
- Not provide a phone number – who can you call when you need help?

ONE THING THAT VIRTUALLY ALL THE SEEMINGLY “LOW COST” SOLUTIONS HAVE IN COMMON, IS THEY NORMALLY ONLY SAVE DATA TO ONE DATA CENTRE – THIS IS VERY HIGH RISK!

Why Choose Depositit?

Solid Roots:

- Established in 1999 - First company in the UK to develop it's own backup software
- As we have developed our own software, we understand the service inside out.
- The service is further enhanced each year based on customer feedback.
- From conception the company ethos was to provide a “secure, easy to use and cost effective solution”. These values still remain at the very essence of our business.

The Highest Security

- 448-bit military grade blowfish encryption is used
- We are the only company in the world that backs up to **3** separate data centres.
- All 3 data centres are commercially independent of each other and located in different locations.
- We are the only backup company in the world that has a business continuity agreement in place that protects our customers! Should anything happen to Depositit, the service will continue to be run for a minimum period of 180 days by Lbi (the largest technology company in Europe).
- All files are stored in secure UK data centres (nothing leaves the UK shores)
- The ability to store upto 10,000 historic versions of your files
- 1000's of FSA Regulated Personnel use Depositit

Flexibility

- Once you have set up your Depositit account, you may install the software onto more than one machine (I.e a laptop and server) at no extra cost.
- The same software can be installed on to desktops, laptops and servers, i.e you do not need to download different software for different machines.
- You can also install the software on to machines in different locations – so you can set it up on your office computer, your home computer and your laptop.
- Depositit will backup Windows, Mac or Linux systems
- Incredible convenience! If you have a Windows computer and a Mac and a Linux you can back them all up under a single account, as such Depositit allows you to keep all information from all machines safe within one storage area.
- With Depositit you can backup all file types from basic Word and Excel files to complicated SQL, Oracle or Exchange databases
- You may backup Servers, networked machines and mapped drives
- True unlimited storage is available (we don't offer 50gb but have small print suggesting this is part of a 'fair usage' policy)
- No files size limits – many businesses have large databases (i.e 10-15gb) and Depositit will back these up
- Set up unique parameters for your different information. I.e Backup your digital photo's weekly but your database daily or keep a monthly snapshot of your accounts.
- Unlimited backups
- Unlimited restores (onto any machine)

Customer satisfaction

- Though a young and dynamic company, Depositit believes in good 'old fashioned' Customer Service.
- Call us and we'll promptly answer the phone
- Email us and we'll get back to you, much quicker than you would expect
- Any problems, we're here to help
- We have never and will never spam our customers, nor will we make our customer's details available to any 3rd party marketing company
- Over 70% of our business comes from recommendation and companies worldwide trust Depositit with their data
- Customers receive confirmation emails after backups and can also click on the client log to view all activity on their account.
- Depositit believe in complete transparency and all prices, security information and details about the service can be found on our website. Nothing is hidden.

Summary:

Depositit provides the easiest and safest way for you to automatically "backup" and "restore" your important computer files. Businesses use Depositit with confidence, knowing that they are using an original and pedigree solution that's compatible with all system platforms and popular Programs, such as CRM, Back office, Email and Doc management solutions.

The service is affordable for companies of every size and we back up and store over 26 Million files every day for thousands of customers worldwide (inc Govm't, Police and Security Forces).

Depositit is recognized as the leading backup solution to the UK's financial sector and is fast becoming the #1 solution within the Insurance field with Zurich, AIG and First Recovery.

Don't risk it –Depositit!

"I really really like your personal and personable customer service."

"Your customer care is a big reason I recommend you guys to everyone I know"

"The service was a doddle to set up and restoring my files was quick and easy"

"Your service has a very professional, yet personal feel, which is reassuring"

Independent Feedback...

The Sunday Times

"Data backup – This is a Priority. Companies such as Depositit offer daily backup of all office data to separate offsite locations."

WHICH?

"Registration was quick and installation easy. Selecting files to backup was a breeze. Restoring data was easy. We think Depositit's ease of use and price make it the most suitable data backup solution."

Cutter Consortium

"While a number of remote backup service providers all offer similar services, Depositit appears to fulfill all requirements at an incredibly low price, and the fact that their encryption is a stronger level than that used by most of the Internet banking industry could be considered overkill but is an indication that the company is serious."
